

# The Sydney Morning Herald.

SYDNEY, SATURDAY, MARCH 2, 1907.

24 PAGES.

No. 21,566. Registered at the General Post Office, Sydney, for transmission by post as a Newspaper.

## SUMMARY.

## FARMER'S AUTUMN FASHIONS.

## LONELY FOR LACE.

"HER LACE WAS HER LIFE." "I have sold a dozen," said the lace maker, "to the ladies at Miraflore. I was 20 years old then. Now I am 40." "Now I have sold all I am lonely for; all the thoughts I have thought, and all the dreams of in that lace, and I wish I could buy it back again."

"It makes her sorrow, but I shall die."

Monsieur, can you tell me for my LACE, MY LIFE, ALL SPUN OUT OF MY LACE."

Sir Edward Grey checked the deliberate misrepresentations Germany, which were conveyed through diplomatic channels.

The German Envoy three times telephoned to President Roosevelt, to warn him of the methods of the German Emperor and Prince Bismarck to frighten France.

Germany's object was to make France yield to the pressure of arms—the port of Casablanca neutral control.

Sir Edward Grey checked the deliberate misrepresentations Germany, which were conveyed through diplomatic channels.

The German Envoy three times telephoned to President Roosevelt, who condemned the methods of the German Emperor and Prince Bismarck to frighten France.

The Navy estimates show a reduction of 100 men, and a reduction in expenditure of £1,000,000.

Lord Selborne maintains that the Transvaal Upper House has been most carefully selected and with a single eye to the country's welfare, irrespective of race or party.

The Royal Commission on life insurance societies in Canada has made some important recommendations.

It severely condemns the investment of funds in speculative stocks, extravagant management, and abnormal expenditure to secure business.

NEW LACE SCARVES.

# BUBONIC PLAGUE.

## GUARD YOUR LIFE.

The importance of keeping every department of the household thoroughly clean and disinfected is brought forcibly home during such distressing epidemics as the Bubonic Plague, Smallpox, and Typhoid.

At such times it cannot be too well known that the systematic use of Lifebuoy Soap is invaluable as a safeguard against Infection, its property as a disease-gorm or microbe killer being an established fact.

Use Lifebuoy Soap from Attic to Cellar, on shelves, doors, floors, floor coverings, and bed, table, and personal linen.

Don't waste the used Suds. Pour them down the kitchen sink and yard drains to keep them sweet.

As a pure, genuine soap and a first-class disinfectant combined there is nothing to compare with

## LIFEBOUY - ROYAL - SOAP

Which has the Largest Sale of any Disinfectant Soap in the World.

**DR. KARL ENOCH, Chemisch. Hygienisches Institut, Hamburg,** put LIFEBOUY ROYAL DISINFECTANT SOAP through a severe test, and proved its power to destroy disease. Solutions of 1 per cent., 2 per cent., and 5 per cent. of LIFEBOUY SOAP in water were made. These solutions were brought to bear on a variety of clean, cultivated germs or microbes, in each case a certain exact time being allowed for the operation. Dr. Karl Enoch gives the result of his experiments as follows:—

Microbes Destroyed.	Solution Used.	Time.
Typhoid	5 per cent.	2 Hours
Cholera	2 "	15 Minutes
"	5 "	5 "
Diphtheria	5 "	2 Hours
Carbuncle	5 "	4 "

**DR. KARL ENOCH writes:**—"From the foregoing experiments it will be seen that the Lifebuoy Royal Disinfectant Soap is a powerful disinfectant and exterminator of the various germs and microbes of disease."

## A GREAT FURNISHING OFFER.

A special offer that solves the problem of how to furnish with taste and style and economy.

We guarantee the timber to be Solid Oak—that every piece is an honest piece, and that the price is lower than you would expect to pay for such furniture.

£75 never before bought a houseful of Furniture like this.

We have many other offers at both lower and higher prices if this one doesn't suit.

### NO. 1 BEDROOM.

PARISIAN BEDSTEAD, in any Art Colour, with Square Tube Posts, Four-ply Wire Mattress, and Set of Best Kapok Bedding.

BEDROOM SUITE, comprising Wardrobe, 4ft wide, and of beautiful design; Dressing Table, 3ft 6in; Washstand, 3ft 6in, with Art Tile Back and Rouge Marble Top; Two Bedroom Chairs to match.

### NO. 2 BEDROOM.

Single Half-tester Bedstead, complete, with Bedding and Wire Mattress, 3ft Wardrobe with Bevelled Mirror and one drawer at bottom, Pair of 3ft Toilets to match, Set of Toiletware, Two Chairs.

### DINING ROOM.

SIDEBOARD, 5ft wide, handsomely carved, with copper mounts, and large Cheval Mirror; HANDSOME COUCH, beautifully upholstered. Two Armchairs, and Six High-back Chairs to match; OVERMANTEL, handsomely carved, with mirrors and copper mounts. ALL IN SOLID OAK—A beautiful suite of original design.

### KITCHEN.

Bedsided Dresser with Cupboards and many conveniences not often seen in a dresser 3ft 6in wide, Kitchen Table, 4ft x 2ft, Two Kitchen Chairs.

COUNTRY RESIDENTS WRITE FOR OUR CATALOGUE AND BUYERS' GUIDE.

YOUR HOME FURNISHED IN SOLID OAK.  
£75 0 0.

"The Store that Saves you Money," 536-538 George-street, opposite Town Hall

## HEARNE'S BRONCHITIS CURE.

### THE FAMOUS REMEDY FOR COUGHS, BRONCHITIS, ASTHMA, AND CONSUMPTION.

**WARNING!** The great success of HEARNE'S BRONCHITIS CURE has induced a number of unprincipled persons to make imitations, each calling his medicine "Bronchitis Cure" with the object of deceiving the simple-minded, and so getting a sale for an imitation which has none of the beneficial effects that HEARNE'S BRONCHITIS CURE has. Consequently it has become necessary to draw your attention to this fact, and to request you in your own interests to be particular to ask for HEARNE'S, and to see that you get it.

HEARNE'S BRONCHITIS CURE, Small Size, 2d; Large Size, 4s 6d. Sold by Chemists and Medicine Vendors, and by the Proprietor, W. G. HEARNE, Chemist, Geelong, Victoria. Forwarded to any address, when not obtainable locally.

**NOTICE.**—Hearne's Bronchitis Cure, No. 1A, does NOT contain any poison within the meaning of the Act. It is equally beneficial for the youngest child and the most aged person.

## COCKLE'S ANTIBILIOUS PILLS.

"I DO NOT HESITATE TO SAY IT IS THE BEST MADE PILL IN THE KINGDOM."—Dr. G. F. COLLIER,

in the Pharmacopoeia of the Royal College of Physicians of London.

FAMED AS A FAMILY MEDICINE FOR A CENTURY. INVALUABLE TO EVERY MOTHER OF A FAMILY.

## SCIENCE NOTES.

(W. G. P.)

### NEW INCANDESCENT LAMPS.

Addressing the Institute of Electrical Engineers, Mr. J. Swinburne discussed the future of the incandescent lamp. He considers that the future belongs to the metallic filament, although the difficulties in the way of its universal adoption have as yet by no means been overcome. It is hard to make a metal filament suited for use with high voltage or alternating currents and at the same time giving a low candle-power. The present normal light gives about 10 candle-power, and it is to be expected that the new systems will be accustomed to a normal light of 50 candle-power. The very high efficiency of the metallic filament has, of course, already been proved. One result of these efforts to improve on the old carbon filament which has held the field so long, is a racking of the more rare chemical elements some of which, it seems probable, will combine the required properties. If this proves to be so, evidently a new and great field for our uses will open up. One essential is a high fusing point, and the extreme difficulty of melting them happened to be a characteristic of many of the rare elements.

There is a high melting point, and is found in some abundance, especially in scandium, zirconium, which occurs as a scatter in sintered iridium.

## UNREADY AUSTRALIA.

## TWO COUNCILS OF WAR.

WHAT AUTHORITY DOES THE COUNCIL POSSESS?

II.

The question whether the military portion of our Military Council of Defence have the power, allowing that they possess the will and the ability, to make and to defend a comprehensive and rational system of defence, The shadow of Ministerial authority is cast across their path. Their political chief presides over their deliberations as the representative of the Government, accredited to listen, but having no real authority to approve. The policy (or what passes for such) of the Ministry in regard to matters of defence is regulated by themselves, strictly, apparently, as a question of the maximum show at the expense of the public funds. The views of military experts receive consideration; but they are not allowed to weight in the balance against foreign concussions. The system hitherto adopted, apparently, has been to throw the pleasantest sop available as a make-weight for the time being, and to supply all deficiencies by liberal promises and emphasised "by-and-by" which, as Hamlet remarks, "is easily said."

The truth is that in assuming directions of the military, and in making of the various defences of Australia, the Federal Government, for the time being has had to face a problem of too complex and intricate a character for ready solution. To use a vulgar idiom they have "bitteen of more than they can chew." Hence the perpetual delays, evasions, and promises, and the attempts to put off the day when the question must be resolutely and definitely dealt with. And to make matters still more complex and difficult, there is the presence of the voice of Commandant-in-Chief held by an Imperial soldier, and dispensed with all our Imperial officers whose services, for purposes of training and organisation—more especially in the scientific branches—were so inestimable. Then, distrusting their own experts, they have had to solicit guidance and advice from the War Office; and when this is tendered, they don't accept it.

Another result of this policy of our Federal Government, by which the Defence Council have to bear the responsibility (though they may have had little to do with it) is that we now have as Brigadiers of the two divisions of our forces in the various States—namely, the Garrison and the Field—officers of the military and volunteers, good, worthy, and energetic officers according to their lights, no doubt, but totally devoid of the qualities required by a professional soldier—men absolutely wanting also in that warlike scoundering so highly and justly commanded by Mr. Ewing, and who

never sit a spanner in the field,

More, the division of a battle know.

When the blind lead—the blind—we know the proverbial result. It is needless to travel again over the ground of the field and magazine—most covered by our military directorate; to recapitulate forms inadequately armed and insufficiently equipped, obsolete field guns, and other equipments of all kinds, of their shortcomings, and without ammunition or wagons—carry it, of course, defective, and incapable of being used. The spirit of amazement in the statement of the year—of Foreign and Native, and the discouragement of the volunteers, etc. All this has become as household words with those interested in Australian defence.

Volunteers, recruited by advice from the citizen service, much exceeded all Board of Military Administration. They have certainly enlisted a few men, but not many, and have been marked by inaptitude and negligence. There appears to be no system or proper method of procedure either in the choice of men, or in their training, or in their selection, and the discouragement of the volunteers, etc. All this has become as household words with those interested in Australian defence.

The COUNCIL MUST HAVE SOME INDEPENDENCE.

If the present system has come to stay, it is clear that there must be radical improvements. At the present time, the Minister hampered personally by the lack of Ministerial members of the Council; for they naturally feel that they cannot do without the services of the military members of the Government, would whilst the army and navy, Governmental heads, suspended, like the sword of Damocles, by a single hair. Who is the character of the Walpah trout? Some of them have been in many ructions. All are fierce, wary, and difficult to catch, and difficult to eat, and are easily washed in place.

Nowhere will the angler find better fish for fun. And the river, too; its surroundings are very attractive. In its upper reaches it is a wild, untamed stream; then it plumes itself among mountain gorges, and leaps down, joining the Pomehakas, and together they journey to the sea.

The park lands within the city boundaries consist of no less than 181 acres, and are bounded by every street and road, and are situated in the heart of the city.

Adelaide is largely an alluvial area, sloping gently from the Mount Lofty Range to the sea. While there are poor patches of soil, there is a great deal of excellent land.

Adelaide is a beautiful city, and as I entered it a gentleman in a suit said to me,

"My dear sir, I have no feeling of being cramped in a city." This is true.

Adelaide is the capital of South Australia.

There are two rivers here within easy reach. One is just below the accommodation-house, the other is two miles distant.

The weather is fine, and the condition for fishing in January, is an excellent

river, and one is almost sure of getting fish in every part.

river, and one is almost sure of getting fish in every part.

The park lands within the city boundaries consist of no less than 181 acres, and are bounded by every street and road, and are situated in the heart of the city.

Adelaide is a beautiful city, and as I entered it a gentleman in a suit said to me,

"My dear sir, I have no feeling of being cramped in a city." This is true.

Adelaide is the capital of South Australia.

There are two rivers here within easy reach. One is just below the accommodation-house, the other is two miles distant.

The weather is fine, and the condition for fishing in January, is an excellent

river, and one is almost sure of getting fish in every part.

The park lands within the city boundaries consist of no less than 181 acres, and are bounded by every street and road, and are situated in the heart of the city.

## THE LATE H. C. RUSSELL.

## AN APPRECIATION.

(BY PROFESSOR DAVID.)

Absorbed and eager in their own work, men of science, no less than the general public, are apt to forget that if science stands higher and has a wider outlook to-day than it had formerly, it is not so much because modern scientific men are better than their forefathers, but largely because we of today have the advantage of standing on top of those ever-growing bulwarks which they who went before us built so well.

Few, perhaps, than those whose privilege it was to know intimately the late H. C. Russell, and who were able to follow him in his many branches of research, are aware of how deeply indebted we all are to his life-long and loyal services in the cause of science.

His astronomical work being outside my sphere, I am not competent to review, much less criticise, it; but the honour of being elected a Fellow of the Royal Society of London, conferred in recognition of his services as an astronomer as well as a meteorologist—and he was the only graduate of Sydney University upon whom this honour has ever been bestowed—speaks for itself.

He was a born mechanician and inventor, and devoted that fine mind of his to the study of the physical thought of remunerative service of the Observatory, especially in regard to the devising and making of new and simple types of metal barometers. One of these was what may be termed an air barometer. This simple type of air barometer invented by Mr. Russell was well received by the Royal Society, and recommended for use on ships and elsewhere where a large fixed anerometer is impossible.

This, too, is used by gunners for calculating the range of shells.

Mr. Russell's electrical barograph, and (4) thermograph, etc.

Mr. Russell was very active in the promotion of education in all kinds. He took a prominent part in organising technical education in New South Wales, and later was the oldest member of the Royal Society of New South Wales, of which he had been Vice-chancellor.

Speaking of his services to the University, I am reminded that many a time he allowed students to bring their instruments to the Observatory for examination, and that he was always ready to give advice and assistance.

He was a shrewd observer, and his reports were always well received.

Realising that fully that all scientific knowledge is based on patient and persistent observation, and recording of phenomena, that in short "science is measurement," he set himself the great task of organising a meteorological service.

When he became Government Astronomer meteorological observations were conducted at stations scattered over the State, distributed with inferior materials and labour, but until the present system, until when he started there were no less than 1300 observing stations, all these sending in returns which were carefully compiled and analysed in the Observatory. What this task meant can easily be realised when it is remembered that by far the larger number of the observers believed 50 per cent.

Now comes tribute to this, in itself, to Mr. Russell's work and influence.

From the year 1877 down to the present there were published through Mr. Russell daily weather maps.

Realising the difficulty of making even approximately accurate daily weather forecasts without the co-operation of his colleagues, Messrs. Eley, and later Baracchini, of Melbourne, and Sir Charles Todd, in South Australia, with their help he built up a system of meteorological conferences, etc., he had secured the co-operation of his colleagues, Messrs. Eley, and later Baracchini, of Melbourne, and Sir Charles Todd, in South Australia. With their help he built up a system of meteorological exchanges of weather news throughout Australia. All these sending in returns which were carefully compiled and analysed in the Observatory. What this task meant can easily be realised when it is remembered that by far the larger number of the observers believed 50 per cent.

Now comes tribute to this, in itself, to Mr. Russell's work and influence.

## WHAT IS A PUBLIC STREET?

## FRUIT-SELLERS AT CIRCULAR QUAY.

## A TEST CASE.

A case of unusual interest was heard by Mr. W. Macfarlane, S.M., yesterday, at the Superior Court, in which the claim of a number of fruit-sellers were proceeded against upon information alleging that during last month, they upon a public street, Circular Quay, sold oranges and other fruit, which were given a standing position for the purpose of offering for sale certain goods, namely, fruit.

The names of the defendants were John Mason, William Reid, Thomas Dunn, John Phillips, Richard Cawood, William Tinkler, Edward Abbott, and George Mait.

Mr. Mast, of the Crown Law Office, appeared to prosecute, and Mr. L. G. Gannon, for the defence.

Mr. Gannon said that he was instructed to represent the claimants in the daily weather maps that Mr. Russell introduced the system of issuing daily weather forecasts. He was aware, of course, of the great difficulties in the way of securing accuracy, due to the insular position of the daily weather maps in the centre of the world from which our Australian weather comes—the area west of Australia, there really vast ocean devoid of any meteorological observatory.

In north-eastern America, for example, where, too, the weather travels from west to east, daily weather forecasting has been carried on successfully through the great expanse of land stretching to the west, where there are numerous observing stations. The same result applies to Europe, though even Great Britain and Ireland; for these, the weather comes mostly from the west, and the Bureau of Meteorology has obtained observations of the American and Canadian meteorologists continually telegraphed over to guide them. Weather practice, therefore, on the other hand, is not so good.

Hemisphere will probably always be more difficult than for a land hemisphere like the Northern Hemisphere. Nevertheless, Mr. Russell did his best, and, in fact, Mr. Gannon attempted the task of weather forecasting, and it can be said that about 82 per cent. of daily weather forecasts issued by him were fulfilled—a very creditable result under the circumstances.

Among his many contributions to meteorology, in addition to the daily weather maps and forecasts, may be mentioned the following:

(1) The publication from year to year of the latest and revised records of New South Wales, which helped to understand the movements of the atmosphere, and with this may be mentioned his administrative paper on "Moving Anticyclones in the Southern Hemisphere." The anticyclones are controlled by the pressure systems, and made known the results of the observations from day to day, so that the same could be available for the public.

Among his many contributions to meteorology, in addition to the daily weather maps and forecasts, may be mentioned the following:

(2) The publication from year to year of the latest and revised records of New South Wales, which helped to understand the movements of the atmosphere, and with this may be mentioned his administrative paper on "Moving Anticyclones in the Southern Hemisphere." The anticyclones are controlled by the pressure systems, and made known the results of the observations from day to day, so that the same could be available for the public.

## PERSONAL.

The Premier, Mr. J. H. Carruthers, arrived at Hobart by the Marquis yesterday, and was met by the Premier of Tasmania, Captain Evans. Mr. Carruthers stated that he was seeking a required holiday, and it was probable that he would go into the country beyond the reach of telephones and telegrams.

At the A.C.C. Rooms yesterday afternoon the Rev. Dr. Clouston, on behalf of the Young People's Scriptural Union, presented the Bishop of Bendigo with a signed address and a panoramic view of Sydney.

At the Hotel de Ville on Wednesday afternoon, the whole of the staff assembled and presented Mrs. Thorpe with two silver-mounted photo frames, and an illuminated address, inscribed as follows:—Presented to Mr. Henry Thorpe, by the employees as a token of their esteem and appreciation upon his retirement from the Oxford Hotel, Sydney, and wishing her every happiness in the future.

The death is announced of Mr. William S. Barnes, who arrived in this State in May, 1887, by the German liner *Prinz Heinrich* for England and the Continent, and Colonels and Mrs. F. Freshell, Hon. Robert and Mrs. Harper, Gen. R. D. Mackenzie, Dr. and Mrs. F. Hayes, and Mr. C. H. Barby, of Kotzebue.

Vice-Admiral Sir Wilfrid Hawke arrived in Melbourne yesterday from Hobart by H.M.S. *Pugna*.

The Governor-General and Lady Northcote will leave Melbourne for New South Wales on Monday.

At a social gathering at Ballarat last night the supporters of the Prime Minister, Mr. Deakin, met to wish him bon voyage upon the eve of his visit to England to attend the Imperial Conference. Mr. Deakin was accompanied by several members of his Cabinet, including Mr. Keating, Mr. Ewing, Mr. Groom, Mr. Chapman, and Mr. Mauger.

Mr. W. H. Smith, chairman of directors of the London branch of Morris, Farmer and Clark, arrived in Sydney on Thursday evening by the *Mooltan*. The trip was a rather rough one at the finish, but Sir William and his party were not greatly inconvenienced. The voyage has been undertaken partly for pleasure and partly for business, and Sir William is glad to receive a hearty welcome from many New South Wales men and old friends whom he had not seen for ten years. His period of stay here is at present indefinite.

The death is announced of Mrs. Anna Bartholomew, who passed away a week ago at her residence, Luther Villa, Coward-street, North Botany, at the age of 84 years. Born at Ryde in 1813, or what was then known as Kissing Point, Mrs. Bartholomew was one of the oldest native-born subjects of the Commonwealth. She was the descendant of the first settlers who had come here with Governor Phillip in 1788. It was at Kissing Point that she first agricultural settlement was established, and from a seedling Mr. Bartholomew raised at Kissing Point for 30 years. Her husband, Harry Thaw, is charged at New York with the murder of Stanford White, a millionaire, has ended.

Her evidence placed her mother in an favourable light, as it was shown that the mother was in the habit of drawing part of the money which White intended for his daughter.

Mrs. Thaw's cross-examination also disclosed that White paid for the schooling of Mrs. Thaw's brother.

CANADIAN FLOUR PRODUCTION.

## HELPED BY CHINA BOYCOTT.

LONDON, March 1. The boycott of American flour in China has been helped Canadian millers to the extent of 100,000 bags.

The Washburn Crosby Company, of Minneapolis, will erect an eight thousand barrel mill at Keweenaw, Manitoba.

GOVERNMENT GRADING.

## PRODUCE EXCHANGE RULE AMENDED.

LONDON, March 1. The Produce Exchange has amended its rule by which buyers accept a Government grader's certificate of quality at the time of shipment as final, by adding "unless the buyer is of opinion an error has occurred in the grading, in which case he will have the option of submitting the matter to arbitration."

THE TRANSVAAL COUNCIL.

## GOVERNOR DEFENDS APPOINTMENTS.

LONDON, March 1. Lord Selborne, Governor of the Transvaal, maintains that the Upper House has been most carefully selected. He is convinced that it will deal with all questions in a spirit of strict impartiality with a single eye to the country's welfare, irrespective of race or party.

AMERICAN EXPATRIATION BILL.

## LONDON, March 1.

Both the House of Representatives and the Senate of the United States have ratified the report of their conference in favour of the Expatriation Bill, which provides that any American citizen who shall reside abroad for a period of five years shall become an alien.

MISS NELLIE STEWART.

## LONDON, March 1.

Miss Nellie Stewart will not visit America. She is returning to Australia after six months' rest.

STATES' CONSTITUTION BILL.

## LONDON, March 1.

The Australian Constitution Bill, enacting that the reservation of certain representation bills for the Royal Assent shall not be necessary, has passed through Committee of the House of Lords.

GENERAL CABLES.

## CANADIAN RIFLE TEAM.

LONDON, March 1. There is a possibility of a Canadian rifle team visiting Australia with a British team.

SAN DOMINGO TREATY.

The Senate of the United States has ratified the treaty for the management by the United States of the finances of the Republic of San Domingo.

CATHCART DEEP LEADS.

Replying to the criticism of the "Age" on the Cathcart Deep Leads, Bewick, Moreing, and Company disavow responsibility for statements in various publications. They say, based their operations upon the reports of Mr. W. Lindgren, of the United States Geological Survey, an undisputed authority on the subject of deep leads. He never proposed concerning the contents of the wash. Mr. J. W. Taverne, Agent-General for Victoria, states that he merely furnished inquirers with the latest official plans and reports.

FIRE IN MELBOURNE.

DAMAGE \$14,000.

MELBOURNE, Friday. A large two-storey brick building, corner of Little Collins and King streets, known as the Western Bond, was fire-tight completely gutted by fire. The business was conducted by Mr. A. W. Soles. The damage is estimated at \$14,000.

If you want to BORROW MONEY, go to THE MONTGOMERY CO., LTD., Capital, £100,000, 140 Collins-street, MELBOURNE, General Manager—Mr. Bennett.

The business was conducted by Mr. A. W. Soles. The damage is estimated at \$14,000.
